※ 组装前，请透彻理解说明书的含义（可到微信群或Facebook小组提问）。

Before assembly, please understand the instruction thoroughly
(You could ask in WeChat group or Facebook group- "DriftArt2 guide and share").

Drift ART - OFM - Offset Master

OFM can effectively reduce the offset of the hubs (rims/wheels). Smaller offsets can not only improve the simulation, but also fit more car shells, making tires not easy to scratch the car shell. If you are using a hub of +1mm or more, the OFM can provide a good effect of reducing the offset value. If you just want to use +0mm hubs, this option doesn't offer a clear change. One world, one ART. Thank you for your attention and support!

蚊车无双 偏距大师套装

OFM能够有效降低轮毂的偏距值，比如把+1.5mm轮毂降到+0mm或-0.5mm的效果。更小的偏距小不仅能提高车子的仿真度，也能适配更多的车壳，使得轮胎更不容易刮蹭到轮眉。如果您在使用+1mm以上的轮毂，这款OP件能够提供不错的降低偏距值的效果。如果您只想使用0度轮毂，这款OP并不能提供显著的改变。无设计，不无双。感谢您的关注与支持！
