New Release 1	99140+98205 DriftART4 Factory Assembled Chassis + CNC Alloy Steering Knuckle & Rear Hub			99140+98205	219		99140+98205 DriftART4 Factory Assembled Chassis + CNC Alloy Steering Knuckle & Rear Hub We are very happy to introduce to you the new generation mini RWD drift chassis, DriftART4. (99140 is factory assembled chassis, no motor , servo, ESC and tires) The previous generation DA3S has been verified by a lot of competitions and has achieved good results in various events. Based on the many original designs of the previous generation, DA4 has been further evolved, improved many details, and further added a lot of original designs to give full play to its excellent performance and original design. 1. Playability: There are a lot of optional parts to choose from. The chassis can be equipped in the direction of competition or in the direction of fun. DA4 is a drift chassis that can be matched with different driving styles. Equipped with a large number of high-quality metal parts, rich adjustability, high assembly precision, even if it is not OP, you can enjoy an excellent and rich drift experience. 2. Compatibility: The chassis supports both 1:28 and 1:24 scale bodies when open the box. Without purchasing additional parts, it can support very narrow car bodies, such as 1:28 AE86, and can install car tongue and L mount parts. Both the front and rear swing arms can be extended, and with the factory-provided long ball cups, they can be matched with a wider 1:24 car body. By purchasing extensions, extremely wide car bodies can be supported. 3. Ease of use. Compared with the previous generation of DriftART chassis, the difficulty of assembly is further reduced, and the installation is more reliable and stable. Two versions are available: 1 Factory assembled version: no assembly is required after receiving it, only the electronic equipments and wheels and chassis need to be installed; 2, Kit version, the parts are packaged according to the installation steps, and the user installs the car according to the order of the parts package, which is easy and clear! Product features: Equipped with dual rate suspension; - The suspension system is composed of CNC-made aluminum alloy and stainless steel, and			
New Price	99140 DriftART4 Factory Assembled Chassis Mini RWD Drift Chassis Compatible with 1-24 and 1-28			99140	199					
Bound with DA4	98811 DriftART Body Mount Slim Set 16-24mm 2 pcs 22-35 2 pcs			98811	12. 9		Dealer notice: This is bound with DA4. If you order 3 DA4, you have to order this at least 1 pcs. Customers will need this part.	DA4	DA3	DA2
Option parts	98812 DriftART Body Mount Slim Short 16-24mm 2 pcs			98812	6. 9			DA4	DA3	DA2
Option parts	98813 DriftART Body Mount Slim Tall 22-35mm 2 pcs			98813	7. 9			DA4	DA3	DA2
New Release 2	97801 DriftART New 1/28 Universal Body Mount Set			97801	12. 9		Dealer notice: This is bound with DA4. If you order 3 DA4, you have to order this at least 1 pcs. Customers will need this part.	DA4		
New Release 3	98990 DriftART 6th Anniversary CNC Alloy Rear Diffuser - Collector's Edition			98990	12. 9			DA4	DA3	
New Release 4	98310 DriftART Moon Walk New Front-End Dynamic System Lightning Version			98310	39. 9			DA4	DA3	
New Release 5	98203 DriftART CNC Alloy Steering Knuckle with Bearing Lock			98203	16. 9			DA4	DA3	
New Release 6	98205 DriftART CNC Alloy Steering Knuckle & Rear Hub with Bearing Lock			98205	29. 9			DA4	DA3	
New Release 7	98805 DriftART CNC Alloy Roll Gear Box Lightning Version			98805	29. 9			DA4	DA3	DA2
New Release 8	98577 DriftART Super Dove Ball Diff Rebuild Set A (Parts Only)			98577	5. 9			DA4	DA3	
New Release 9	98578 DriftART Super Dove Ball Diff Rebuild Set B (Parts Only)			98578	3. 9			DA4	DA3	
New Release 10	98403 DriftART Dual Rate Suspension CNC-Alloy Rear Shock Tower			98403	7. 9			DA4		
New Release 11	98410 DriftART BRS - Body Roll System For Dual Rate Suspension			98410	25. 9		B.R.S. - Body Roll System This innovative system brings a strong body roll action. At the same time, it is conducive to evenly distributing the weight of the four wheels during drifting, making the drifting easy to control and less unexpected overrun. This set is now compatible with the Dual Rate Suspension system.	DA4	DA3	DA2
New Release 12	98411 DriftART BRS- Body Roll Syste Connector For Dual Rate Suspension			98411	5. 9			DA4		
New Release 13	96404 DriftART Dual Rate Suspension Front Shock Parts			96404	8. 9			DA4		
New Release 14	96405 DriftART Dual Rate Suspension Rear Shock Parts			96405	7. 9			DA4		

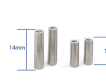

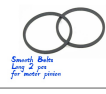

New Release 15	96406 DriftART Dual Rate Suspension Fish-Eye Shock Parts			96406	9.9			DA4		
New Release 16	96407 DriftART Dual Rate Suspension Extended Rear Shock Shaft			96407	2.9			DA4		
New Release 17	96503 DriftART Quick Release Drive Pins For Stepless Extendable Dogbone - 4pcs			96503	2.9			DA4		
New Release 18	96683 DriftART Ball End Height Adjustment Set A - 2pcs +0.5mm, 2pcs +1mm			96683	3.9			DA4		
New Release 19	96684 DriftART Ball End Height Adjustment Set B - 2pcs Standard, 2pcs +0.5mm, 2pcs +1mm, 2pcs Double Ball Ends			96684	6.9			DA4		
New Release 20	96803 DriftART M2 Custom Aluminum Standoff Set - 6mm (4pcs), 10mm (2pcs), 15mm (2pcs)			96803	4.9			DA4		
New Release 21	96821 DriftART M2 Aluminum Spacer Set - 2 mm (4pcs), 1mm (4pcs)			96821	1.9			DA4		
New Price	98202 CNC Alloy Locking Rear Hub Alu. DriftART			98202	16.9		The Locking Rear Hub is equipped with a bearing lock, which can eliminate the shaking of the bearing and reduce the play. Don't lock the screw too tight, just lock it lightly to keep the bearing running smoothly.	DA4	DA3	DA2
New Price	98503 DriftART New Steel Sandwich Gear			98503	7.9		Precision gear made of STAINLESS STEEL in sandwich structure. Installed in gearbox and on the spur drive shaft.	DA4	DA3	DA2
Option parts	98004 DriftART DA4 Conversion Set With New Metal Options			98004	109			DA4	DA3	
Recent Release	98311 EX-Arm Lightning Alu Rear Arms DriftART			98311	29.9		98311 EX-Arm Lightning Alu Rear Arms, compatible with DriftART 4th, 3rd, and 2nd generations. The EX Aluminum Alloy Rear Arms Lightning Edition is made of aerospace-grade aluminum alloy and allows for infinitely adjustable rear track width, enabling your chassis to easily adapt to a wide range of widths, from ultra-narrow to ultra-wide. Each side of the rear arms can extend by 6mm, with a maximum total extension of 12mm, making it compatible with all 24-28 size car bodies. 98501 Steel 3X Motor Gear. This set includes 10T, 12T, and 14T gears, offering a 1:4x gear ratio change, providing more flexibility for your chassis setup. The motor gear features an optimized dynamic balance design, ensuring smoother motor operation and making installation easier and more accurate compared to previous versions. A fan can be mounted on the motor gear, which must be purchased separately under item number 98502. 98502 Wind Walk Cooling Fan. This fan is installed on metal motor gear and generates powerful airflow as the motor operates, providing cooling for the motor. It features a robust and solid protective cover, which enhances safety to some extent. Please ensure the protective cover is installed before using the fan to avoid potential hazards such as cutting the battery or other dangerous components, which could lead to a fire. Additionally, do not touch the fan while it is operating to prevent cuts or injuries. 98501+98502 Steel 3X Motor Gear + Wind Walk Cooling Fan. 98501 Steel 3X Motor Gear. This set includes 10T, 12T, and 14T gears, offering a 1:4x gear ratio change, providing more flexibility for your chassis setup. The motor gear features an optimized dynamic balance design, ensuring smoother motor operation and making installation easier and more accurate compared to previous versions. 98502 Wind Walk Cooling Fan. Option parts	98903 DriftART4 Alu. Front Lower Arm Mount			98903	12.9		-CNC made Alu. Front Lower Arm Mount. -With Contrary Lock System, no need of spacers. -With precise scale, it can show the center position of the servo and the swing amplitude of the servo.	DA4	DA3	
Option parts	98904 DriftART4 Wheelbase Master			98904	32.9		- CNC made Alu. baseplate. -Stepless adjustable Wheelbase from 90mm to 120mm. -With precision measurements of wheelbase and servo position. -The lightweight and narrow body design makes the car body more concise and slender. Combined with the reinforced ribs, it provides excellent rigid support. -Strengthening the support for the rear of the chassis makes the installation of the gearbox easier and more stable.	DA4	DA3	
Option parts	98905 DriftART4 Alu. Front Bumper			98905	8.9		- CNC made Alu. Front Bumper. -Lightweight design. -DriftART Car Tongue can be installed. -DriftART 1/24 body mounts can be installed. -DriftART 1/28 body carbon fiber tongue can also be installed.	DA4	DA3	DA2
Option parts	98803 DriftART New DVF-Hub Alu. Roll Center of Servo			98803	23.9			DA4	DA3	DA2
Option parts	98804 DriftART Swap Master Expandable Battery Holder Inspired By Supercars			98804	32.9			DA4	DA3	
Option parts	98814 DriftART Extensions for Swap Master			98814	9.9			DA4	DA3	
Recent Release	98101 DriftART DA3 Axle of Offset Master			98101	9.9			DA4	DA3	
Recent Release	98308 DriftART4 7° Backsweep Alu. Front Lower Arms			98308	17.9		-CNC made Alu. front lower arms. -Lightweight design. -With 3 position shock mount, provides 3-Level suspension, which is Soft, Medium and Hard.	DA4	DA3	

Option parts	98302 RTM Rear Toe Master Alu. 7075 (Rear Arm Toe Mount) DriftART			98302	17.9		The RTM itself provides two tie rod geometries, matched with the metal rear hub holes. Can form 6 geometric forms forming an integrated rear arm system, adjusting the toe will not affect the corner, making it easy to adjust quickly and stamenable and install.	DA4	DA3	DA2
Option parts	DriftART TDS Transformable Drive Shaft Alu. 7075			DA-SFT-TDS7	19.9		T.D.S. is made of 7075 Alu. and carbon steel, which greatly improves durability, maintenance and practicability. T.D.S. can support V-belt and gear drive in the future. The V-belt set on is expected to be available in October 2022. Although it is sold separately, it can be installed directly and easily. Your options will go on sale in 2023, so stay tuned. One world, one ART. Thank you for your attention and support!	DA4	DA3	DA2
Option parts	98802 Master Motor Mount Alu.6061-T6 DriftART			98802	9.9		Strong and easy to bend, good thermal conductivity, helps the motor dissipate heat when it's hot to the max, extremely quiet.	DA4	DA3	DA2
Recent Release	98701 DVF Dual Vector Foil 3D Steering System Alu Servo Arm DriftART			98701	23.9			DA4	DA3	DA2
Recent Release	98575 DriftART Super Dove Ball Diff Unassembled Kit			98575	36.9		- DIFF is a differential oil and needs to be assembled by the user. - The CVD cup has two interfaces compatible with the For DriftART4 (DA4) and DA2. If you buy the corresponding CVD, it can also be used on the DA2 series. - Equipped with double bearings, correct link, and expanding rubber ring, combined with high precision processing, it can ensure easy installation and has a carbon damping feeling to meet the performance requirements of all cars. - Equipped with damping rubber columns, anti-lowering screws, and anti-roll-over structure, the damping can be easily adjusted without removing any parts.	DA4	DA3	
Recent Release	98576 DriftART Super Dove Ball Diff Factory Assembled			98576	42.9		- DIFF is an factory assembled version and does not require user assembly. - The CVD cup has two interfaces compatible with the For DriftART4 (DA4) and DA2. If you buy the corresponding CVD, it can also be used on the DA2 series. - Mainly made of 7075 aluminum alloy to meet the needs of most users. - Equipped with double bearings, correct link, and expanding rubber ring, combined with high precision processing, it can ensure easy installation and has a carbon damping feeling to meet the performance requirements of all cars. - Equipped with damping rubber columns, anti-lowering screws, and anti-roll-over structure, the damping can be easily adjusted without removing any parts.	DA4	DA3	
Option parts	98571 DriftART4 High Concentricity 7075 Alu. Solid Axle			98571	12.9		- Sandwich nesting structure, stable and accurate installation, high concentricity. - Hollowing and Lightweight design. - Made of 7075 aluminum alloy, wear-resistant and durable. - The CVD cup has two interfaces, compatible with the For DriftART4 (DA4) and DA2. If you buy the corresponding CVD, it can also be used on the DA2 series.	DA4	DA3	
Option parts	98402 DriftART4 Dual Rate Suspension set			98402	25.9		- CNC machined 6061 aluminum steel, gold-plated lower. - One set of spring with different stiffness can be combined to create a variety of stiffness and hardness. - Increased the adjustability of the suspension. Provides dual-stage support. Absorb more vibrations and stabilize the chassis. - Rebound damping profile can be adjusted digitally for quick and easy adjustment. - Combined with shock absorber and anti-lowering screws, and anti-roll-over structure. - Combined with 7 sets of springs, and there are 7 additional springs to choose from. Please to purchase separately. No.98202	DA4	DA3	
Option parts	97402 DriftART4 Expansion Springs Pack for DA4			97402	5.9		No.97402 This is an expansion spring package, which is in addition to the spring that comes with the DA4 chassis, providing users with more spring options. Can be matched with more suspension rubbers and bushings. Additional users please consider purchasing.	DA4		
Option parts	98204 DriftART Alu. CNC Simulation Brake System			98204	22.9			DA4	DA3	
Option parts	98214 DriftART Alu. Simulation 3D Brake Discs Plus			98214	9.9			DA4	DA3	DA2
Option parts	97301 DriftART DA3 Wide body D-axis +5mm on each side			97301	5.9		DriftART DA3 Wide body D-axis with scale stainless steel +5mm on each side. (Only use for DA3)	DA4	DA3	
Option parts	97513 DriftART4 Extendable Dogbone Extensions +3 to 6mm per side			97513	4.9		-DriftART4 original dogbones can be steeply extended by 0-3mm, and use these 2 extension pieces, dogbones can be extended by 3-6mm.	DA4		
Option parts	97511 DriftART +3mm Rear ArmsLong Plates			97511	3.9			DA4	DA3	
Option parts	97501 40T belt Long-Narrow and 30T gear for TDS drive shaft DriftART			97501	7.9			DA4	DA3	
Option parts	97502 V-belt 40T 2 pcs Long-Narrow Type 1.2mm 2 pcs (For TDS) DriftART			97502	5.9		Narrow type 1.2mm wide V-belt helps to obtain lower resistance. Using For TDS.	DA4	DA3	
Option parts	97503 V-belt 40T 2 pcs Long-Wide Type 1.5mm 2 pcs (For TDS) DriftART			97503	5.9		Wide type 1.5mm wide V-belt provides long service life and strength. Using For TDS.	DA4	DA3

Recent Release	96403 Dual Rate Suspension Parts-A DriftART			96403	4.9		No.96403, Replacement spare part for the DriftART4 Dual Rate Suspension set.	DA4		
Recent Release	96102 Stainless Steel Pin Set 12pcs 1.5mm x 12mm 14mm 16mm DriftART			96102	3.9		The 96102 has been upgraded to stainless steel material, making it durable and rust-resistant. It has a diameter of 1.5mm and comes in lengths of 12mm, 14mm, and 16mm, with four pieces of each size. It is compatible with all versions of the DriftART chassis and metal rear arms.	DA4	DA3	DA2
Recent Release	96502 DriftART4 Stepless Extendable Dogbone +0 to 3mm			96502	10.9		-Made of stainless steel by CNC, high strength and anti-breakage. -Extendable Dogbone could be extended by 3mm Steplessly -42mm Thickened Brass Pins, Self-Lubricating, Replaceable. The Straight Aisle is made of 7075 aluminum alloy. The brass pin is self-lubricating and not easy to wear, and softer than 7075. The pin can be quickly replaced even it is worn. -Use with additional pieces No.97515 to get 6mm extending.	DA4	DA3	
Recent Release	96500 DriftART4 Rear Wheel Axle set			96500	5.9		-Made of stainless steel by CNC, high strength and anti-breakage. -Fixed by stainless steel elastic buckle, will not break due to aging.	DA4	DA3	DA2
Recent Release	96402 DriftART4 Default Springs Pack for DA4			96402	4.9		No.96402, The spring pack is the same as the spring that comes with the dual-rate shock suspension set used by DA4 chassis. Normally, users do not need to purchase the spring pack separately. Users who have lost their springs or have other modifications need to consider purchasing them.	DA4

Spare parts	DriftART 24T Steel Gear DA-GEAR-24T	 No. 24T		DA-GEAR-24T	4.9		The pinion gear is 25T, and the sun gear is 24T, which makes the 1:1 ratio more stable and better reduces the transmission resistance and the temperature of the motor. However, 24T gears are only recommended for use with 25T gears (not 26T). Otherwise, the belt will slide when the car starts to accelerate (before loading). 10 year belt is 14gms, it is probably a 25T gear.		DA3	DA2
